Analytical and problem-solving undergraduate student with Java, C++, Linux, Python expertise and web development expertise. I am dedicated to solving challenges and ready to learn technological innovation to enhance my skill set. Proficient in leadership and public speaking for effective project management and communication

PROJECTS

MR.DR-HOSPITAL MANAGEMENT SYSTEM

TECHNOLOGY STACK: JAVA (SWING AWT), MYSQL
DURATION: 2022-2023

"Mr. Doctor" is a Java-based Hospital Management System designed to streamline hospital operations. The system provides an admin panel for managing doctors, including adding, updating, and deleting doctor records. Doctors can log in to prescribe medications, view patient history, and update medical records.

BRAVO CINEMA-CINEMA MANAGEMENT SYSTEM |

TECHNOLOGY STACK: JAVA | MYSQL
DURATION: 2023-2024

A Java-based Cinema Management System designed to solve the problem of cinema managers organizing screenings more efficiently, keeping a record of movies and showtimes, managing ticket sales, and handling customer details securely. This system's front and back end are built on Java Swing and Java AWT, and for database management, MySQL is integrated.
